## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of group II, claims 10-12, in the reply filed on 11/29/2005 is acknowledged. This is not found persuasive because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-9 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to the nonelected group I.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Copsey et al (5,507,999).

The Copsey et al reference discloses a method of manufacturing wall panel comprising: applying heat to a first polymer sheet 60, pressing a first mold 26 into contact with the first polymer sheet 60, applying a vacuum to the first polymer sheet 60 and the first mold 26; applying heat to a second polymer sheet 61, pressing the second polymer sheet 61 into contact with a second mold 20; applying a vacuum to the second polymer sheet 61 and the second mold 20; and bring the first polymer sheet 60 into contact with the second polymer sheet 61 to form the wall panel (Fig. 6A).

Regarding claims 11 and 12, the method comprises heating the first and second polymer sheets to a first and second pre-defined temperature.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Juaire et al, Rhoades et al and Tirrell et al teach a method of manufacturing a wall panel.
